

1BL Lab Expectations

In 1BL it is expected that you complete your academic assignments on your own and in your own words. The assignments have been developed by the Instructor to facilitate your learning and to provide a method for fairly evaluating your knowledge and abilities (not the knowledge and abilities of others). So, to facilitate learning, you are authorized to discuss pre-lab and post-lab questions with your classmates. However, to ensure fair evaluations, you are **NOT** authorized to use the answers developed by another, copy the work completed by others in the past or present, or write your academic assignments in collaboration with another person. If the work you submit is determined to be other than your own, you will be reported to the Academic Integrity Coordinator for violating UCSD's Policy on Integrity of Scholarship. If you do not understand these expectations and authorizations, please speak with the Instructor as soon as possible as no academic assignments will be accepted without this signed form.

My signature below confirms that I will complete my assignments with integrity according to the expectations and authorizations stipulated by the Instructor.
